

# RU ORA-7

## WATER BASE OIL REMOVER

Proper maintenance is very necessary for running any industry efficiently.

One of the main problems faced by an industry is spillage of oil in the working place making the work place unsafe.

Normally cleaning of oil is done by conventional method which consumes long man hours resulting in loss of production apart from the residue left behind in the workarea.

### **SOLUTION PROVIDED BY US**

We at Natural Ruchem India have successfully developed an Eco-Friendly, Bio-Degradable and Water Based Solution under the Brand name "Ru ORA-7" which removes/cleans any type of oil from any surface without damaging the surface in any manner. We have a product Ru ORA 7 that can resolve this issue, thus helping you save on manpower and excess expenditure. Our product has been tested Non Toxic by Institute for Industrial Research and Toxicology, Ghaziabad.

### **PETROLEUM INDUSTRY**

**Ru ORA-7** is an ideal solution for maintenance for mainland and offshore oil rigs, ships, distribution pipelines etc.

**Ru ORA-7** is very useful for cleaning of spillage and keeping the floors free from oil making it safe for working. It is recommended for cleaning offshore oil platforms.

### **HEAVY EQUIPMENTS**

**Ru ORA-7** is ideal for cleaning oil which helps in maintenance of heavy equipments like Cranes, Excavators, Earthmovers, Bulldozers, Loco Engines etc.

### **RU ORA-7 AS OIL REMOVER**

- It gives absolutely clean and dry surface without leaving any trace of oil which also helps to locate oil leakage easily if any.
- It saves time, energy, resources and money.
- It is water based and therefore can be used in off-shore oil rigs easily.
- It can be used for removing oil from any Metal, Rubberized, Plastic, Rexene etc. surfaces without damaging the base.
- It can also be used as a foaming agent to control fire.

### **RU ORA-7 AS DE-RUSTER**

- Concentrated Ru ORA 7 can be used to open rusted nut bolts as it reacts only on oxidized (rust) portion. It does not damage original metal.

### **RU ORA-7 AS CARBON REMOVER**

- Carbon is normally removed with the help of fossil fuel i.e. Diesel, Kerosene etc. Ru ORA 7 gives better results despite being water based.

### **PROCEDURE**

- It is very user friendly. Spray Ru ORA 7 on the affected area leave it for few minutes to help the reaction start.

### **RU ORA-7 AS DE-RUSTER:**

- Concentrated Ru ORA 7 can be used to open rusted nut bolts as it reacts only on oxidized (rust) portion. It does not damage original metal.
- Ru ORA 7 can be diluted with water in the ratio of 1:1 to 1:10 as needed, making it cost effective.

## Benefits

- A 3-in-1 product which removes oil, rust and carbon soot.
- It is speedy and user friendly.
- Being non-flammable, water based it can also be used in oil drilling, underground mines etc.
- As it is water based, does not harm human beings, plants or the environment.
- It has no bleaching and fluorescent whitening agents or CFC.
- It saves energy, resources and money.
- It does not react with any metal, rubber, plastic etc.
- It helps conserve Diesel and Kerosene which are normally used for cleaning.
